MURILO GIAMPICCOLO PAPA

Full Stack Developer | React, Next.js, TypeScript, Supabase

Systems Analysis and Development student | Available for daytime work

São Paulo, Brazil | +55 11 94425-5805 | murilopapag@gmail.com | linkedin.com/in/murilogiampiccolopapa
github.com/murilogpapa | murilogp.dev

SUMMARY

Full stack developer with a front-end focus. I build complete web applications with **React, Next.js, TypeScript, Tailwind CSS** and **Supabase (PostgreSQL)**, including authentication, database security (RLS), payment API integrations, testing and deployment on Vercel. I also build a desktop app with on-device AI and use Claude Code to develop software and automate workflows. Looking for an internship or junior software development role.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, SQL, Python, Java; basic Rust, C and Swift

Front-end: React, Next.js, Vite, Angular, Tailwind CSS, PWA

Back-end and data: Supabase (PostgreSQL, Auth, RLS), Node.js, REST APIs, webhooks, MongoDB

Integrations: Stripe, Asaas, Google Calendar API, OAuth, Resend

Tools: Git, GitHub, Vercel, Vitest, Tauri, VS Code

AI: Claude Code, Grok Build and Grok agents, Google Antigravity and AI Studio (Gemini API), local LLMs (llama.cpp, Ollama), Hunyuan 3D, AI workflow automation

Design: Photoshop, Lightroom, Premiere, After Effects, Affinity Designer, Blender

Hardware: ESP32, IoT, computer maintenance, 3D printing

PROJECTS

NotchMuc | Desktop app for Windows and macOS — **2026 - Present**

Tauri, Next.js, Supabase, Stripe, llama.cpp

- Build and distribute an app that turns the top of the screen into an interactive "island", with media, calendar, file transfer and screen mirroring modules.
- Integrated an AI assistant that runs 100% on-device (Qwen2.5 via llama-server), with allowlisted tools and no open access to the system.
- Sales website in Next.js with OAuth login (Google, Discord, GitHub), Stripe Checkout, per-device licensing and a session deep link into the app.

UGest | Personal project: SaaS for on-call doctors — **2025**

Next.js (App Router), TypeScript, Tailwind CSS, Supabase, Vercel, Vitest

- Started as a tool for my sister, an on-call physician, and grew into a full SaaS: shift calendar, income dashboard, payment tracking and Brazilian income tax reports.
- PostgreSQL database with Row Level Security, rate limiting, access logs and LGPD (Brazilian data protection law) compliance, reviewed in security audits.
- Integrations with Asaas (payment API and webhooks), Google Calendar (Google-verified OAuth) and Resend (transactional email).

Ordem Files | Personal project: tabletop RPG platform — **2024**

React, TypeScript, Tailwind CSS, Supabase

- Built a campaign platform for my group's Ordem Paranormal tabletop RPG, with character sheets, game master tools and visual themes, used by more than 20 players.

Other projects: WebGarage, a car dealership website in Angular using a vehicle price API (github.com/murilogpapa/webgarage); MucFiles, an offline-first notes PWA (Next.js, Supabase, Yjs); DevPath, an online course platform (Next.js); MeshSplitter, a Python desktop app (PySide6); FiveM game server (2020 to 2021, HTML, CSS and JavaScript).

EXPERIENCE

Founder and 3D Designer | o3DMuc — **2024 - Present**

- Design 3D printable models inspired by video game characters (since 2026), published on Patreon (subscription) and MakerWorld.
- Built an AI-assisted creation pipeline (image generation, image-to-3D conversion with Hunyuan 3D and manual finishing in Blender) that automates repetitive steps without losing quality.
- Started out selling 3D printed products, such as a smart sticker album holder with an NFC tag linked to a 2026 World Cup collection tracker I built (Next.js, Supabase).

Graphic and Motion Designer | Freelance — **01/2021 - 2024**

- Brand identity, logos, labels and packaging on demand; photo editing (Photoshop, Lightroom) and video editing (Premiere, After Effects).

IT Technician | Freelance, institutional client **08/2026**

- Assembled and set up 15 Windows 11 computers, using a standardized system image cloned to SSDs (Clonezilla) to speed up deployment.

EDUCATION

Technologist Degree in Systems Analysis and Development
Senac University Center, Santo Amaro
02/2026 - 06/2028 (expected) | In progress

Technical Diploma in Internet of Things (IoT), integrated with High School
Senac Nações Unidas | 2022 - 2024 | Completed

IoT Application Development Assistant
Senac Nações Unidas | 2022 - 2024 | Completed

Computer and IoT Support and Maintenance Assistant
Senac Nações Unidas | 2022 - 2024 | Completed

IoT Automation Support Assistant
Senac Nações Unidas | 2022 - 2024 | Completed

ADDITIONAL COURSES

AI for Real Programmers (IA para quem programa de verdade)
curso.dev (Filipe Deschamps)
2026 | In progress
Coding agents (Claude Code, Codex), MCP, skills and Spec-Driven Development

LANGUAGES

Portuguese: native

English: B2 (upper intermediate)

INTERESTS

AI-assisted development, information security (ethical hacking), ESP32 prototyping and 3D printing.
